High Flying Fun at MOSI

TAMPA, Fla. (December 19, 2022) – Ever wanted to test your pilot skills with a drone? Now you can in MOSI’s Flight Club at the Museum of Science and Industry every day! Included with the price of admission, this exhibit will challenge you to fly the drone through several obstacles in the MOSI drone cage.

Flying drones offers both youth and adults the opportunity to use technology they may not have at home. Drone usage is growing and is used in multiple industries. MOSI’s Flight Club allows guests to explore and learn about flying a drone. While testing their abilities, guests are problem-solving to keep it in their air and going through the obstacles. The MOSI Flight Club is available thanks to the generous support of GTE Financial.

“Everyone should come out and test their flying skills in the MOSI Flight Club. It helps people with hand-eye coordination and it’s a lot of fun. Drone Education is important because drones are used in many fields and it is helping children prepare for jobs that haven’t even been created yet!”, said Ian Reed, Academic and Youth Programs Manager.

Drones are available for flying every day from 10:15am – 10:45am, 11:45am – 12:15am, 1:45pm – 2:15pm and 3:45pm – 4:15pm. For more information, visit the MOSI website at www.mosi.org.
