Cooler Temps = Cool Camps at MOSI

TAMPA, Fla. (December 12, 2022) – As we approach the holidays, the Museum of Science and Industry (MOSI) will be hosting Winter Break camps for children in Kindergarten through Eighth grade. These camps offer authentic, hands-on experiences to explore science, technology, engineering, mathematics and art (STEAM) topics during their time off. Campers may try science experiments, complete engineer design challenges and even become innovators to make their ideas come to life!

Attending a MOSI camp is a fantastic way for kids to keep their minds activated during a break from school. While they think they are just making new friends and having fun, they are actually engaging in meaningful projects! These activities will help them explore, apply, and analyze, giving them skills they can take back to the classroom.

“Kids are naturally curious, so let them be curious in a fun, safe atmosphere! It’s really important to introduce STEAM topics to kids early because the younger they are, the more likely they are to spark their interest and get comfortable with STEAM,” said Janet White, Director of Education.

Camps are a week long and are offered December 26 – 30, 2022 and January 2 – 6, 2023. They run from 9:00a.m. – 4:00p.m. with extended hours available from 7a.m. – 6p.m. For more information about MOSI Winter Break Camps, visit www.mosi.org.

MOSI is a 501(c)(3) non-profit, community-based institution and educational resource. For 60 years, The Museum of Science & Industry (MOSI) has been offering programs to all in the Tampa Bay community that focus on a variety of science, technology, engineering, arts, and mathematics. MOSI is located at 4801 E. Fowler Avenue, Tampa, FL 33617
