

Adult Group Experience Package

Join us for a unique and immersive experience designed exclusively for adults—a blend of exploration, learning, and entertainment. Explore cutting-edge exhibits, participate in hands-on activities, and marvel at celestial wonders in our planetarium.

Tailor your experience with customizable packages, perfect for corporate outings, team-building events, or social groups. Starting price is based on a group of at least 15 people.

Level 1 - Quest	Level 2 - Expedition	Level 3 – Odyssey <small>*No more than 30 people</small>
<ul style="list-style-type: none"> • Access to main exhibits • Planetarium Show 	<ul style="list-style-type: none"> • Access to main exhibits • Planetarium Show • Choice of 1 Program 	<ul style="list-style-type: none"> • Access to Main exhibits • Planetarium Show • Choice of 1 Program • SciLinx Mini Golf
Starting at \$255	Starting at \$330	Starting at \$405
\$17 per each additional guest	\$22 per each additional guest	\$27 per each additional guest

If Levels 1 or 2 have groups of more than 30 people, they must be split into smaller groups to accommodate room capacities.

Program Options

• Ridiculous Reactions (Chemistry)

o Become a chemist and experience what happens when the elements encounter each other. Create hot ice and learn how the reaction helps people that live in colder climates. Make colorful Elephant Toothpaste, then finish by creating a mini-firework and art sculpture from heating baking soda and powdered sugar.

• Kinetic Art (Engineering)

o Experience the action of art in motion as you and your group master the mechanics of movement by building a Rube Goldberg-style machine. Teams work together to build a complex machine using pulleys, gears, marbles, and other engineering contraptions. Combining fundamental forces with creative invention, experience the pride of building a wild, moving, chain reaction.

• Robot Engineers (Robotics and Coding)

o Take on the role of a NASA engineer to build and design a Mars rover. Use your imagination and problem-solving skills to guide robots across various terrains to collect samples. Discover amazing places in our solar system while exploring the field of robotics.

• CSI Tampa (Forensics Science)

o Solve a simulated crime by performing a variety of techniques used by forensic scientists in the DEA and FBI labs. Analyze evidence such as hair and blood samples and use chemistry to identify unknown substances to solve a simulated crime.

• Butterfly Bonanza (Life Science)

o Explore the life cycle of a butterfly from caterpillar to chrysalis to butterfly. Discover which plants attract butterflies and serve as food for caterpillars. See the butterflies up close and personal in our butterfly garden.

Ready to embark on a scientific adventure? Reserve your spot now and experience the wonders of the universe like never before!
