

CURIOUS KIDS 2025 - 2026

Join us each month for a 1.5-hour hands-on science adventure designed just for preschoolers! Every class includes stories, songs, experiments tied to a unique science theme. Perfect for curious minds and busy hands!

- Ages 3 - 5
- Parents may accompany child in the workshop, or take a break and enjoy MOSI
- Program is in the Center for Learning from 10:00am – 11:30am
- Monthly themes connected to literature with hands-on activities
- Pre-registration and payment are required at least two weeks in advance
- **Program fee:** \$15 per program / **MOSI member:** \$10 per program

Bubble Science

September 10, 2025

Pop into a world of bubbles! Children will explore what bubbles are made of, experiment with bubble wands, and learn how to make bubbles of different shapes and sizes. Get ready to mix, blow, and giggle your way through bubbly discoveries.

Weather Watchers

October 8, 2025

Is it sunny, cloudy, rainy, or snowy today? In this class, little learners explore weather patterns through songs, crafts, and hands-on science. We'll make our own weather tools and pretend to be meteorologists for the day!

Animal Explorers

November 5, 2025

Roar, hop, and slither as we explore animals big and small! Kids will learn about habitats, animal coverings like fur and scales, and even match tracks to creatures. We'll investigate animal sounds, build nests, and pretend to be our favorite animals.

Space Adventurers

December 3, 2025

3, 2, 1...blast off into space! Preschoolers will learn about the moon, stars, and planets through imaginative play, stories, and hands-on activities. We'll build rockets, make crater art, and explore what it's like to be an astronaut.

Sink or Float?

January 7, 2026

Time to make a splash! Young scientists will predict, test, and observe which objects sink or float in water. It's a hands-on way to explore cause and effect, make guesses, and learn like real scientists.

Bug Bonanza

February 4, 2026

Creep, crawl, and flutter into the world of insects! Kids will explore bug habitats, count legs and wings, and pretend to be bees and butterflies. With bug hunts, magnifiers, and crafts, we'll go on a tiny adventure!

Our Five Senses

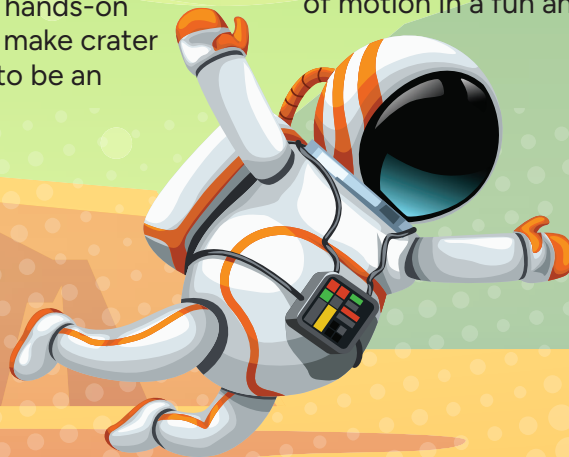

March 4, 2026

Let's see, smell, hear, taste, and touch! In this sensory science class, preschoolers explore their five senses with hands-on experiments and playful games. We'll make texture boards, smell mystery jars, and listen like scientists.

Magnets and Movement

April 8, 2026

What sticks? What moves? Little hands will explore the invisible force of magnets and investigate how things push and pull. Kids will play with ramps, rolling toys, and magnets to discover the science of motion in a fun and active way.
