

CURIOUS KIDS

2026-2027

10:00am-11:30am

Join us each month for a 1.5-hour hands-on science adventure designed just for preschoolers! Each class includes stories, songs, and experiments tied to a unique science theme. Perfect for curious minds and busy hands.

- Ages 3-5
- Parents may accompany child in the workshop or take a break and enjoy MOSI
- Program check-in is located in the museum lobby
- Monthly themes are connected to literature with hands-on activities
- Preregistration and payment are required at least 2 weeks in advance
- **Program free:** \$15 per program
MOSI member: \$10 per program

September 2, 2026

Plant Power

From tiny seeds to growing plants, let's dig into the world of plants. Children will explore how plants grow, discover different plant parts, and plant their own seeds to take home.

October 7, 2026

Light Lab

What makes a shadow? How does light move? Preschoolers investigate light and darkness using flashlights, shadow play, and hands-on experiments.

November 4, 2026

Animal Explorers

Roar, hop, and explore animals big and small! Children will learn about animal habitats, coverings like fur and scales, and discover how animals move and live.

December 2, 2026

Sound Science

Let's make some noise! Children will explore how sounds are made, and how we hear them using simple instruments, vibrations, and playful experiments.

January 6, 2027

Things That Go

Zoom, roll, and race into science! Preschoolers will explore how objects move using ramps, rolling toys, and push and pull games. Children will make predictions, test ideas, and discover what makes things go.

February 3, 2027

Wind & Air

Preschoolers will explore wind and air through hands-on activities using scarves, fans, feathers, and movement games. Children will discover something we can feel even though we can't see it.

March 3, 2027

Healthy Bodies

Move like scientists! Children will learn about muscles, bones, and movement through active games, songs, and playful investigation.

April 7, 2027

Building & Balance

Preschoolers will design, build, and test structures using blocks and building materials. Kids will explore balance and problem-solving as their creations stand or fall!
